

Delivering Quality through Measurable Value

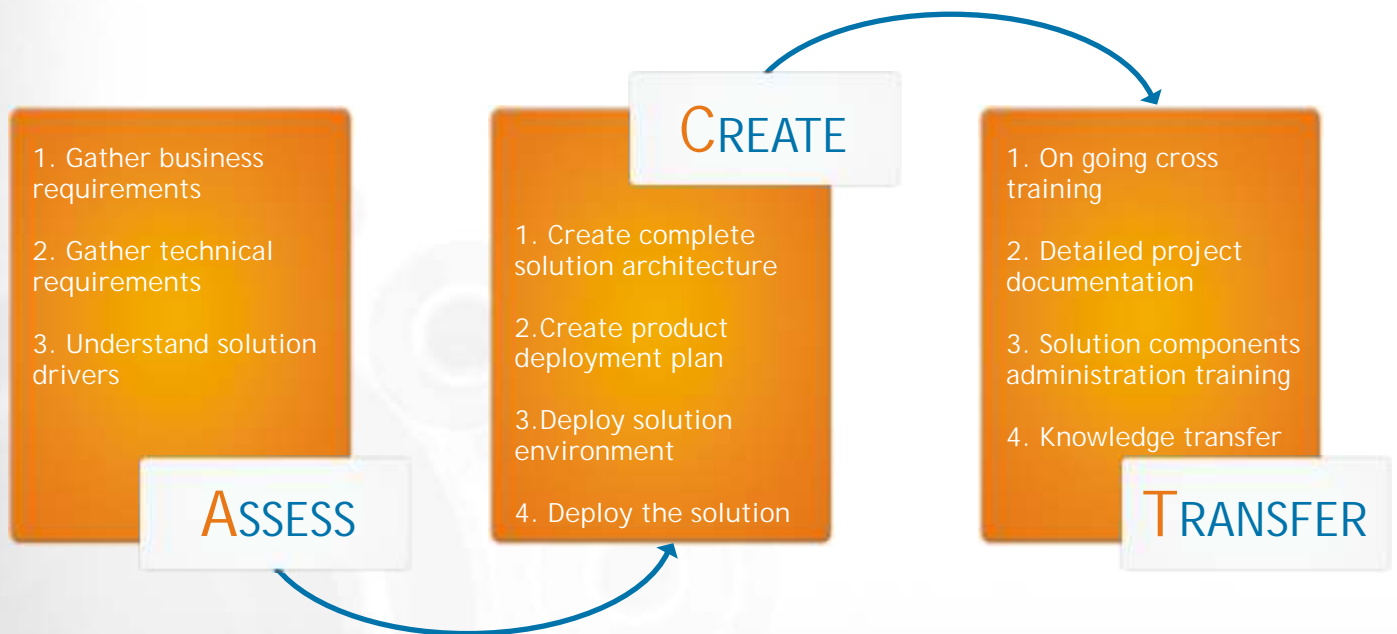

The last 4 decades of software development has helped the industry get mature in terms of processes and resources. However the software quality and testing industry still lacks the maturity and continuously strives to match up to the standards of its counterpart.

Even after the industry has acquiesced to test automation as an interim solution, the success rate of test automation is still not assured. The initial approach and tool finalization is a time taking process and often SMEs are uninformed about the most cost effective solution to apply. These factors eventually push the cost of testing and test automation, which further inhibits software businesses from implementing a critical component for long term sustainability.

ZenSOFT understands this gap and helps bridge it with its best in class testing and test automation services. With almost a decade of experience, ZenSOFT leverages its extensive expertise in designing and deploying test automation solutions with a measurable value. Our focus is to help optimize investment on technology testing by deploying industry's most reliable technology solutions in the field of test automation like unit, functional, GUI automation, performance, security, SOA, etc.

- Experienced partner in helping build best in class business practices towards testing and quality assurance
- Improving profitability through reduced costs, lower TCO, improved quality, and shorter time to market
- Reusable assets providing further resource optimization
- Business intelligence driven from in depth data mining and analytics

OUR CUSTOMERS

"ACT" - SOLUTION DELIVERY MODEL

- Association with industry stalwarts like IBM, HP, etc.
- Expertise in design approach, scoping and sizing test automation, methodologies & best practices
- Mature business practices and engagement processes
- Expertise in building custom frameworks across various tools and technologies
- Z-TAF™ : our own product ensures required ROI on test automation efforts

OUR OFFERINGS

Services

Outsourcing

As a trusted value partner, ZenSOFT continues to innovate through its highly matured outsourcing practices that help our clients reduce costs and increase profitability. The scope of our outsourcing skills are spread across end-to-end testing, test automation, performance engineering, CoE development and management, infrastructure management, etc.

Consultancy

ZenSOFT offers comprehensive consultancy services in the areas of functional test automation, test management, performance engineering, and application security. Our certified and experienced consultants strategically map business challenges to the best in class technology solutions to help build a strong competitive advantage.

Training

Exhaustive training on:

Functional test automation and realistic approach

Entire IBM software suite like Robot, Test Manager, ClearQuest, etc.

Entire HP software suite like QTP, BPT, LoadRunner, etc.

Product Sales

ZenSOFT's product catalogue comprises of entire IBM Rational Test suite and the HP-Mercury suite. Along with this, we also offer ZenSOFT's very own Z-TAF™ - a test automation platform that completely reduces dependency on dedicated test automation professionals. ZenSOFT uses a structured and a well defined process to help customers take right decisions on technology adoption, implementation, and also provides a continuous and proactive support.

ZenSOFT Services Pvt. Ltd. has helped us optimize our testing efforts by automating our manual functional testing activities. The technology used by them to automate was one of the best in the market and they developed an innovative and scalable framework, which significantly reduced the effort on script and code maintenance. It also helped to accomplish good amount of test automation. This is a significant development for us as our application is business critical and operates under real time, needing 100% reliability as well as very quick turnaround Time.

To manually perform a regression test, the manual team otherwise would have required running almost 25000 test cases taking up lot of man power and an equally higher regression cycle time. This automation exercise has resulted into 100% coverage leading to better accuracy of regression testing. It has also reduced the regression cycle time considerably.

ZenSOFT Services Pvt. Ltd. and our internal resources have worked as a team throughout the project execution, thus ensuring project transition a very smooth affair.

I like the professionalism, convenience, and ease of doing business with ZenSOFT Services Pvt. Ltd. They offer sound advice and good suggestions in their area of expertise. Their service has been excellent and response time great.

We have been extremely pleased with their services and quality of work.

- NSE.IT

Our Strategic Alliances

Awards & Accolades

Awarded 'Best Value Partner of IBM' in 2005,2006,2007,and 2008 in the category of Software Sales & Services.

About ZenSOFT
